YSC-2EX Pump Controller

The Yamada YSC-2EX Pump Speed Controller provides a reliable cost-effective solution for accurate speed / flow control of externally operated pumps. There is no extensive programming required for setup and works with a direct or remote mount solenoid. Through the large lighted front panel display, information for both rate (cycle speed), fluid displacement per minute, and totalization (number of cycles) is easily attained.

Features:

- Easy to use
- Large lighted readout liquid crystal display
- Easy monitoring of cycle and volume totals
- Variable speed control
- Allows for flow rate adjustment at any given delivery pressure
- Micro-processor controlled
- Four modes of operation
 1. Timed - no feedback
 2. External feedback-single input (fiber-optic)
 3. External feedback-duel input (duel fiber-optic)
 4. Flow meter input capable (feedback only)
- Re-settable fuse
- Flow meter or fiber-optic interface
- Enclosure meets NEMA 4 seal-ability standards
- Alarm output (ex. no cycle, pre-set minimum and maximum cycle speed)
- English or Metric units
- Simplifies preventative maintenance schedules
- Power requirements:
 - YSC-2EX-DC (DC powered)
 - YSC-2EX-AC12 (AC powered, 12 VDC output)
 - YSC-2EX-AC24 (AC powered, 24 VDC output)
- Replaces Yamada series YSC-1EX
- Reference form no. MYS-093 for Installation and operation Instructions

Form No. YS 0803
